*The Eye of Photography* asked the galleries exhibiting at Photo London to each present five photographs to be purchased. NextLevel Gallery features a solo presentation of work by American artist Liz Nielsen for its first-ever participation in the Photo London Fair. Liz Nielsen works in an analog color darkroom where a pitch-black environment allows only the vision of the mind's eye. There, and without a camera, Nielsen creates unique photograms by building her own negatives and painting with light.
